

iStarUSA's Renaissance Product Lines: D-230, 340, 350

Having already helped penetrate multiple markets, these versatile product lines now boast a variety of sizes, tray and trayless options, and faster connection

Renaissance Chassis

From multimedia and home theatre PC's to security and surveillance system integration, the D-230, 340, and 350 product lines are made for multiple markets. They deliver universal value with their compact sizes and HDD hot-swappability.

Equipped with USB 3.0

The D-230, 340, and 350 series boast USB 3.0 technology, a dramatic improvement from USB 2.0. Transfer rates are up to ten times faster, power management and efficiency has been improved, and bandwidth has been expanded to allow simultaneous reading and writing between two connected devices.

Perfect for Home Theatre PC's

With a slim optical drive bay and front audio I/O ports, they're able to provide integral support for multimedia systems that stand alone or are integrated into home entertainment systems. And with storage capacity up to 3 TB per bay, these chassis maximize data storage and backup functionality at the same time. They provide the perfect platform for HTPC builds using popular AMD and Intel processors.
