## 2U 6x3.5" Hotswap Compact Chassis

### *Keep Cool Quietly*

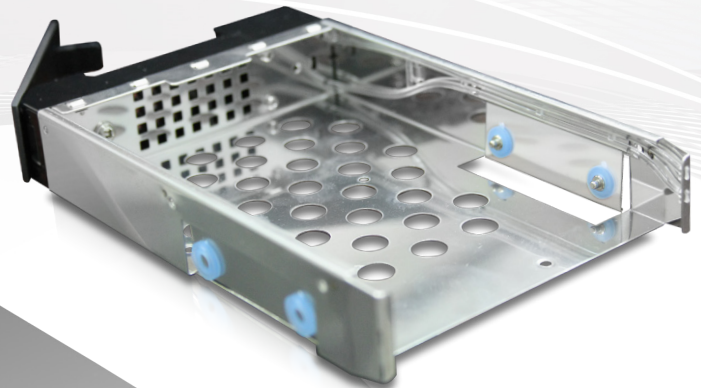

Three centrally located 80mm fans create optimum cooling while keeping the process very quiet. In fact, you might even think it's unusually quiet. If that still isn't cool enough, there is an extra slot for another fan in the center of the chassis.

### *Ditch the Screwdriver*

6x 3.5" Hotswappable and Toolless HDD Trays create the most convenient hard drive experience possible. The trays allow you to slip your hard drives in and out without any screws and without having to turn off your system. These trays are even equipped with key locks in order to provide both security and convenience.

### *Utilize Your Space Well*

Its 2U compact size is perfect for an ATX Motherboard and its backplate is compatible with any 2U power supply. Included are also two USB connectors and six empty expansion slots for future expansions.
