

# WM Series

## Built for Security

### *Convenient Size for Your Environment*

The WM Series is a line of cabinets that are relatively shallow in depth. They are meant to contain equipment for security purposes, thus are small enough to be mounted on a wall or hidden away for greater safety and discretion.

### *Secure Access*

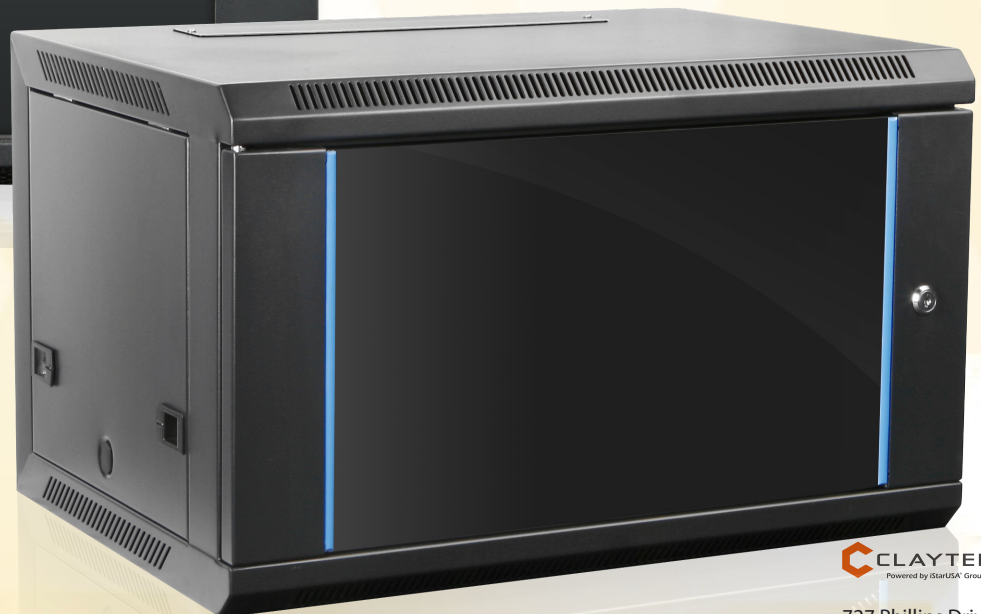

Used by educational institutions to lock up equipment such as surveillance and timecard machines, these cabinets are built with security in mind. They have a heat-treated glass front door for extra strength, and a security key lock for the most secure access. These cabinets provide easy side panel access so you can conveniently perform routine maintenance, while they can also be locked to prevent unauthorized access.

### *Optimal Cooling*

The WM series incorporates optimal cooling design. The partially vented frames, and two optional AC fans that can be put on the top panel, give the wall-mount cabinet excellent air ventilation.

### *Choose Your Finish*

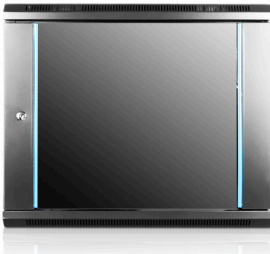

Sustain your cabinet in any environment by choosing your ideal finish: Degreasing, Acidification, Phosphoric, Static Electricity or Powder Coat Surface Finish.
