

# iStarUSA® Group

## OEM/ODM Services

Our expert engineers work hard to create the perfect solutions for your needs.

### OEM/ODM Solutions

With decades of experience and innovative engineering, iStarUSA is sure to provide you with the most individualized and superb solutions. In order to give you the best possible service, iStarUSA Group has teamed up with ISG Industrial to create a one stop source for IPC manufacturing solutions in the domestic and international markets. From custom design to branding services, we have the experience and capability to turn your ideas into reality.

### Our Services

We at iStarUSA Group offer OEM/ODM services for **Industrial Rackmount Chassis**, **Cabinets** and **Metal Sheet Products**. Through our skilled metal bending, milling, and silk screening we can provide you with unique customizations that will make your product stand out from the rest. With iStarUSA Group's OEM/ODM Solutions you can be sure to receive one-of-a-kind products for your one-of-a-kind business.

#### 4 Service & Support

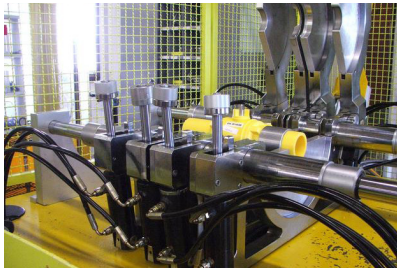

- Logistic services
- After-sale support

\*Prototype and/or initial sample fees are refunded as discount upon production order

## Current Applications

ISG Industrial can fulfill all your application needs. We have experienced mechanical engineers and CAD designers to transform chassis from concept to reality. ISG Industrial specializes in custom chassis that allow our customers to offer elegant name-branded representation. ISG Industrial also focuses on the performance and scalability of our chassis. Whether the application requires rugged military, industrial IT storage, or special gaming designs, ISG Industrial can tailor chassis to meet specific space and functionality needs as well as thermal and power requirements. The goal of our OEM/ODM services is to help our customers succeed in today's ever changing and extremely competitive markets.

**Factory Automation**

**ID Bezel Design**

**Medical IT solutions**

**Storage Solutions**

**Transportation  
Systems**

**Military**

Whether your project is a simple matter of adapting an existing storage solution to a different form factor or configuration; or if your project entails a significant extension of conventional specs in parameters such as storage density, total capacity, data transfer rates, new connectivity standards, etc.:

We are experienced, knowledgeable, and flexible enough to understand how changes in one subsystem can affect all other subsystems.

We do this every day on behalf of clients in a variety of industries, and these services are at your disposal as well.
